Antifreeze Tester Hydrotemp

Brand:	BGS
Article number:	9670
EAN:	4026947096704

Description

- robust and break-proof type
- for checking the radiator antifreeze quality
- usable for antifreeze/water mixture based on ethylene-glycol-(ethandiol)
- display accuracy: 0.5°C
- suction bulb made of elastomer is flexible at all times and guarentees function in all temperature ranges
- hydrostatic block prevents automatic discharge and retightening of air the display
- display is immediately stoble
- non-drip suction tube
- all temperature twin measuring element, swivable 360º
- for direct reading
- measuring scale in Celsius
- measuring range 0 up to -40°C

Technical data

Packaging suitable for wall hanging	Yes
Gross weight	150 g
